FUGRO GEOS / SUT UNDERGRADUATE SCHOLARSHIP LAUNCHED

NEWS RELEASE

A major proactive step towards the promotion of marine science, underwater technology and marine engineering education has been undertaken by Fugro GEOS, the world's leading oceanographic company. They are offering a scholarship worth \$5,000 to an undergraduate student pursuing a course of studies that embraces at least one of the relevant areas.

To facilitate this Fugro GEOS Inc has teamed up with the Society for Underwater Technology – Houston Chapter (SUT Houston) who will manage, assess and review the applications.

Applicants may be students of any nationality in full-time study at any accredited college or university within the United States, but particularly in Texas. This is the first educational scholarship ever awarded by Fugro GEOS Inc.

Last year the SUT Houston awarded three \$5,000 scholarships to qualifying undergraduates.

This year, in addition to the Fugro GEOS and SUT undergraduate scholarships, SUT Houston will also be awarding a \$10,000 graduate scholarship.

Applicants are welcomed from the fields of marine science, technology and engineering or mainline science and engineering courses where students can demonstrate an interest in pursuing a career in the marine field or a marine application for their studies. Undergraduate students must have completed at least one year of full time study, and must be enrolled full time while receiving the scholarship. Graduate students must also be enrolled in full time graduate study.

Both Fugro and SUT Houston look forward to continued collaboration to advance the education of future subsea engineering and marine science professionals. Full details and scholarship applications and further information about SUT Houston can be found at

www.SUTHouston.com. The deadline for application is June 15, 2005. The scholarships will be awarded for academic year 2005-06.
